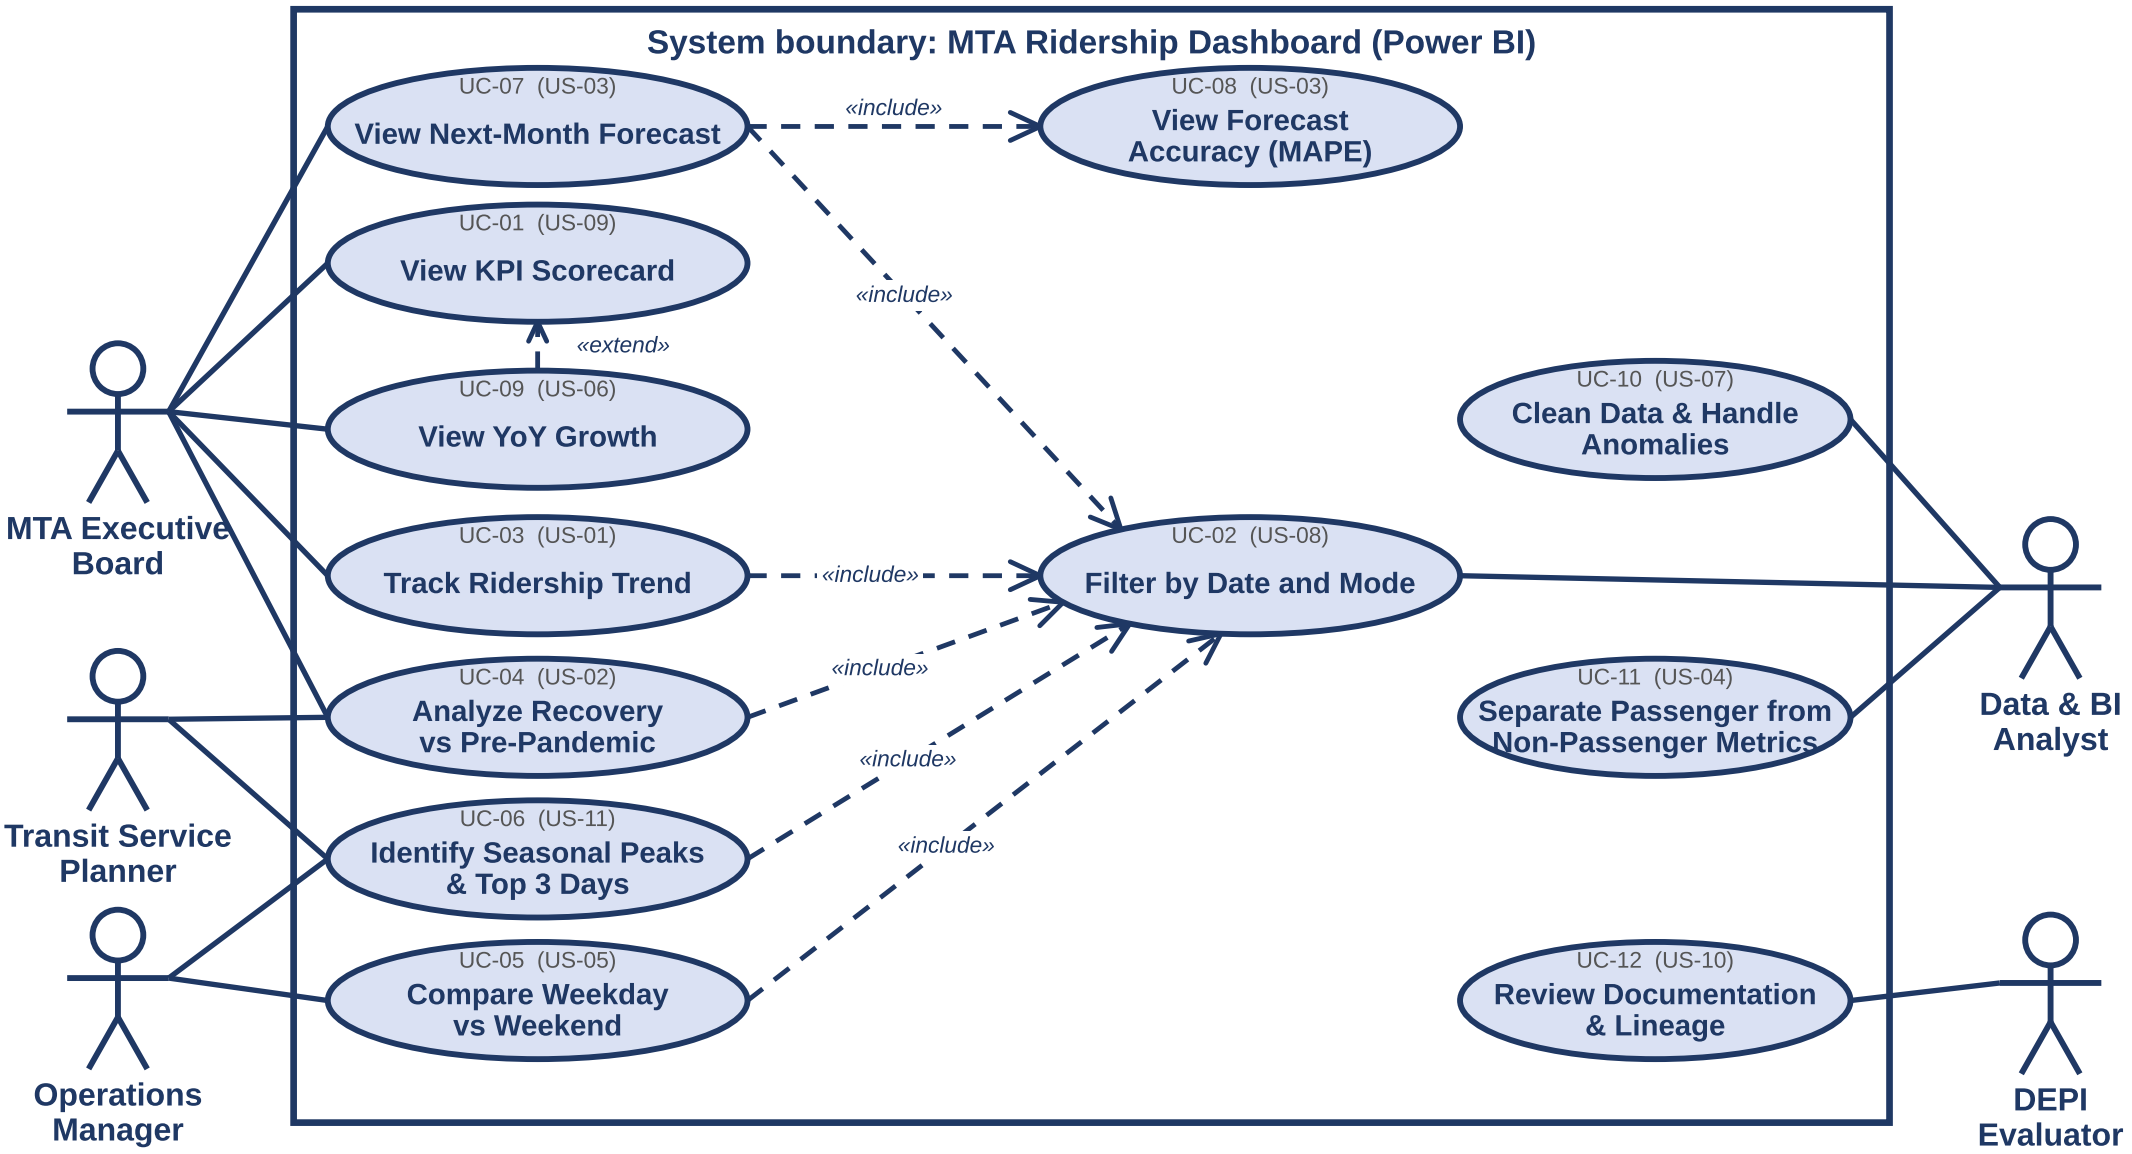
MTA Daily Ridership Dashboard — Use Case Diagram

DEPI · Data Analysis Track · Phase 2: Design & Analysis



Legend

- Use case (UC-xx = ID, US-xx = linked user story)
- Association: the actor uses the use case
- «include» / «extend»: arrow points to the included / extended use case

Notes

- The Data & BI Analyst can also open every dashboard use case (UC-01 to UC-09); those lines are omitted to keep the diagram readable.
- UC-10 serves US-07, which is written from the Service Planner's view; the Analyst performs the cleaning in Power Query.
- Actors come from the Stakeholders table in 04_Requirements.
